

New CTP Replacement Parts for Heavy Equipment

CTP U-CUP SEALS

CTP U-Cup Seals -

The U-Cup seals are made of Polyurethane, which ensures they have the exact flexibility for a greater efficiency and easy installation. Because of their design and composition, CTP hydraulic seals offer a better friction and adapt better to high temperatures, prolonging the life of the seal. At the same time they also offer a better sealant resistance to high pressures avoiding leaks and pollution.

Some of the characteristics of the CTP U-Cup Seals are:

- ✓ Polyurethane compounds
- ✓ Hardness, durometer: 90 Shore A
- ✓ Tensile Strength: 55 Mpa
- ✓ Ultimate Elongation 550%
- ✓ Temperature Intermittent: -22°F / 150°F
